

August 20, 1949.

Dear Carl:

When we returned to the lab this morning, Dr. Brink told me that they had found your book which was left in the library. In hopes that it will be more convenient, we are retaining the book and enclosing a check for \$5.60 (7.00 less 20% prof. disc.) in payment. If this is unsatisfactory for any reason, tear up the check, and we will return the volume posthaste.

The Goldschmidt conversion hypothesis is given in:

"Crossing Over ohne Chiasmotypie", Genetics, 2, 82-95 (1917); and
Bridges' critical reply in:

"An intrinsic difficulty for the variable force hypothesis of
crossing over." Amer. Naturalist, 51: 370-373 (1917).

Thanks again, and very much, for the hospitality we enjoyed from yourselves
and the Lindegren clan.

Sincerely,

Joshua Lederberg
